

360° View Links of Freecom, Wenger & Swissgear Products from CCI Website

Resellers can utilise the following links to show the 360° views on their websites without having to physically host the content (although this is preferable if possible). These links show the 360° view without any CCI branding and can be launched in a new window that hides the source URL too.

For any new products in the future “-standalone” should be suffixed to the end of the product’s URL, for the non-branded view.
